Geography Terms

Across

2. is a large body of salt water that surrounds a continent.
4. is a narrow body of water that connects two larger bodies of water.
5. is an imaginary circle around the earth, halfway between the north and south poles.
7. is a deep valley with very steep sides often carved from the Earth by a river

10. is a hill or a ridge made of sand. Dunes are shaped by the wind, and change all the time.
11. is the height of an area, measured from sea level.
12. is a body of land that is surrounded by water on three sides.
13. is a natural hot spring that occasionally sprays water and steam above the ground.
14. The meridian at 0 degrees longitude.

Down

1. is the half of the Earth that is north of the equator.
3. is a low place between mountains.
6. is a large, flat area of land that is higher than the surrounding land
8. is a part of the ocean (or sea) that is partly surrounded by land (it is usually larger than a bay).
9. is a body of water that is partly enclosed by land.
