# Algebra

## Across

1. the answer to a multiplication problem
3. a law that is followed in mathematics
7. the part left over
10. an expression consisting of two terms
13. a pictorial representation
14. a measure of steepness of a line
15. part of a whole
17. the y values

18. a polynomial with three terms

19. the study of mathematical equations

21. stays the same

## Down

2. to find the solution

4. mathematical statement that contains an equal sign

5. an unknown in an algebraic expression

6. mathematical sentence that does not have an equal sign

8. the number in front of the variables in a term

9. one of four regions into which coordinate axes divide a plane

11. shows a mathematical relationship between expression

12. the x values

16. parts of an expression

20. a solution of an equation
