

Name: _____

Date: _____

Rocks

Across

8. formed through a series of processes
 14. rock formed by other rocks
 15. term used to describe metamorphic rocks that have layered grains
 16. rock formed when magma cools or hardens
 18. sedimentary rock formed by remains of plants and animals
 19. presses sediment tightly together
 20. process that breaks down rock and other things

Down

1. look and feel of a rock's surface
 2. process that moves weathered material
 3. rounded and hollow rock often lined with mineral crystals
 4. common minerals that make up most of the rocks in Earth's crust
 5. igneous rock formed when lava cools and hardens
 6. igneous rock formed when magma cools or hardens
 7. sedimentary rock formed when minerals dissolved in a water solution crystallize

9. a series of processes that occur on Earth's surface and in the crust and mantle that changes rocks slowly
 10. dissolved minerals crystallize and form rocks
 11. sedimentary rock formed by rock fragments squeezed together
 12. sediment settles out of the wind or water carrying it
 13. particles of minerals or other rocks
 17. small and solid pieces of material that comes from rocks or living things
