Name:	Date:	

## Glaciation

## **Across**

- **4.** A sharp, narrow mountain ridge
- **5.** A round hollow in a hillside
- **8.** A flow of water that is either to small or large to have eroded the valley in which it flows
- 10. A small mountain lake
- **11.** Water that has frozen into a solid

**12.** A crevasse at the head of a glacier

## **Down**

- 1. An elongated lowland between ranges on mountains, hills or other uplands
- **2.** The upper part of a glacier where the snow turns to ice
- **3.** A scenic area of north-west England including the Cumbrian mountains and some 15 lakes
- **6.** The process of wearing down or rubbing away by means of friction.
- 7. Granular, partly consolidated snow that has been passed through one summer melt season but is not yet glacial ice
- **9.** Loose rock or debris covering a slope
