

# Evolution by Chandler Hindman

## Across

- 7. the gradual change of a species over time
- 8. the process by which a new species evolves from another species
- 9. same function but different structure
- 10. changes in the DNA
- 11. a trait that helps an organism survive and reproduce

## Down

- 1. closely related species evolve to have differences in their structures
- 2. same structure, but different function
- 3. any difference between members of the same species
- 4. the word used to describe when a species no longer exists
- 5. random changes in gene frequencies
- 6. a group of species who are similar and can mate amongst each other
