

immune system

Across

- lymph is pulled from
- lymphatic massage strengthens the
- thrombocytes AKA
- example of specific immunity
- makes clots
- where t cells mature
- white blood cells
- axillary, inguinal, popliteal, terminus and cisterna, chyli
- where ALL lymph nodes drain
- lymph follows
- these remove and filter pathogens and debris from lymphatic fluid
- liquid connective tissue
- number of superficial lymph node locations
- where the largest amount of lymph fluid drains
- proteins produced by B cells that destroy antigens
- fluid between tissue cells

Down

- Intestinal lymphatic tissue
- white blood cells that filter out old red blood cells
- secretes antibodies
- micro-organisms and invaders in the blood are called
- Lymphatic vessels have these to keep lymph going one direction-
- lymphocytes are formed in
- white blood cells that destroy debris
- largest percent of blood cells in the body
- clear watery fluid that surrounds cells
- gland that provides immune support early in life
- lymphatic massage starts here
- stores blood in the body, and is located in the upper left quadrant of the stomach
