# Facial Aesthetics

## Across

4. Most commonly used filler in the cheek bones/upper face

6. The process of clearing a clogged or compacted pore by manual or mechanical means.

11. The first fractionated laser that uses both ablative and nonablative technology.

13. A cosmetic hyaluronic acid dermal filler designed to treat mild to moderate wrinkles and folds that form in the lower face.

14. This product is formulated to help reduce the appearance of fine lines, wrinkles and dark circles

16. Also known as Intense Pulsed Light therapy or the photo facial, uses cutting edge technology to produce younger looking skin that's firmer, and more even in tone and texture.

17. New age microdermabrasion, which includes exfoliation, extractions, chemical peel with glycolic and has hyaluronic acid in it

18. Also known as Intense Pulsed Light therapy or the photo facial, uses cutting edge technology to produce younger looking skin that's firmer, and more even in tone and texture.

19. This treatment pokes tiny holes in the skin so the collagen can come in and rebuild and fill in wrinkles or acne scars.

## Down

1. A form of electrosurgery which has been used in treating common and recalcitrant warts.

2. This serum lifts the dead cells, or "unglues" them from the skin, exfoliating them off the skin's surface to reveal a more refreshed appearance.

3. Temporarily relaxes muscles and softens wrinkles/fine lines

5. A safe procedure for exfoliating the epidermis and ridding the skin of fine vellus hair

7. A microneedling treatment with Radio Frequency

8. An non-invasive form of liposuction

9. Most popular filler to use in the lips

10. An FDA-approved injectable that helps gradually replace lost collagen — an underlying cause of facial aging — for results that can last more than two years.

12. An injection used to help decrease the appearance of fat that hangs below the chin, sometimes called a double-chin

15. This serum is excellent for treating rosacea, cystic acne, insect bites and some forms of dermatitis.
