

Electricity crossword

Across

3. What the circuit goes on
 4. a stable subatomic particle occurring in all atomic nuclei
 6. It comes from a thunder cloud
 10. It turns the circuit on and off
 11. The thing that powers a circuit
 13. Being killed by electricity
 17. alternating current
 20. Holds electricity
 24. a stationary electric charge, typically produced by friction,
 26. The thing that powers a torch
 27. also known as electric charge
 29. Its element symbol is CU
 31. A object you press
 32. When the circuit is running
 35. measuring instrument used to measure the current in a circuit

36. A scientist that discovered electricity

37. Italian physician, physicist, biologist and philosopher who discovered animal electricity

Down

1. an object that allows electricity to flow through it
 2. is an abnormal connection between two nodes of an electric circuit intended to be at different voltages
 5. The electron is a subatomic particle, symbol e^- or β^- ,
 7. Opposite of positive
 8. When there's no light
 9. A person who fixes lights
 12. an apparatus for reducing or increasing the voltage of an alternating current.
 14. Emits light
 15. It resists
 16. Used as a conductor for electricity
 18. Cuts wire

19. What's inside a battery

21. the unit used to measure electric current.

22. Metal Fe

23. Measures ohms law

25. A flow electric charge

28. The course electricity takes

30. A point connected to the ground

33. is the point at which a conductor from an electrical component, device or network comes to an end and provides a point of connection to external circuits

34. the SI unit of electromotive force, the difference of potential that would carry one ampere of current against one ohm resistance
