# Phagocytosis

## Across

3. Cell death that does not trigger inflammation
5. Last step in the phagocytosis process
7. Everyday protectors of tissue
9. First step in the phagocytosis process
10. More killing power than macrophages

## Word Bank

Sentinel  
Neutrophil  
pyroptosis

Phagolysosome  
macrophage  
granulomas

apoptosis  
Chemotaxis

fever  
Exocytosis

## Down

1. Phagosome fuses with enzyme filled lysosome
2. Macrophages, giant cells and T cells form concentrated groups
4. Strong indication of infectious disease
6. Cells in the bodies first line of defense
8. Cell death that does trigger inflammation
