# Climate and the Greenhouse Effect

## Across

5. Venus is too \_\_\_\_\_ to have life

9. The g\_\_\_\_\_ e\_\_\_\_\_ keeps the earth at a livable temperature

10. Mars is too far away from the sun and is too \_\_\_\_\_ for life.

11. Earth is "just right" according to the G\_\_\_\_\_ principle.

12. Greenhouse gases are found in the Earth's A\_\_\_\_\_.

## Down

1. Humans are responsible for c\_\_\_\_\_ c\_\_\_\_\_.

2. Burning f\_\_\_\_\_ f\_\_\_\_\_ releases carbon dioxide into the atmosphere

3. This greenhouse gas comes from farting cows, M\_\_\_\_\_

4. This is a Greenhouse gas, C\_\_\_\_\_ D\_\_\_\_\_

6. Another greenhouse gas, W\_\_\_\_\_

7. More greenhouse gases in the atmosphere means the Earth is w\_\_\_\_\_ up

8. Heat radiated from the Earth is trapped by greenhouse g\_\_\_\_\_.
