

Labor and Delivery

Across

- 2. The fetus is in a longitudinal lie with the buttocks or feet closest to the cervix
- 6. Secretion of milk from the breast
- 9. The fluid surrounding a fetus
- 11. The normal discharge from the uterus after childbirth
- 12. The lower part of the uterus that dilates as labor progresses
- 16. Used to determine the position of a fetus inside the woman's uterus
- 18. A synthetic form of oxytocin, used to induce labor
- 19. Shortening of the uterine muscles occurring at intervals before and during childbirth

Down

- 1. Cervical thinning
- 3. A surgical cut made at the opening of the vagina during childbirth
- 4. The procedure by which the amniotic sac is deliberately ruptured
- 5. A decrease in the fetal heart rate below the fetal baseline
- 7. The sensation that a pregnant woman feels when the baby drops
- 8. The fluid-filled sac that contains and protects a fetus in the womb; membranes
- 10. The act of giving birth; childbirth
- 13. The opening of cervix as it is pulled upward and fetus is pushed
- 14. The top portion of the uterus
- 15. A situation at childbirth where the fetus is in a longitudinal lie and the head enters the pelvis first
- 17. The location of the presenting part of the fetus in the birth canal
