

Natural Disasters

Across

5. When the land starts to sink into the ground

11. A storm in shape of a spiral that is similar to a cyclone

12. When snow falls off a cliff in multiple turns

14. A storm similar to a blizzard but more snow is involved

15. A fire that gets out of control and hurts anything it touches

Down

1. When there is heavy rainfall and it gets out of control

2. When a volcano erupts

3. A cold storm normally in the coldest parts in the world

4. A disaster that shakes the Earth

6. A fire that happens in nature areas

7. When there has not been any rain for a long time

8. A huge wave caused by an ocean-floor earthquake

9. A whirling storm caused by the wind

10. A storm that normally happens in the desert

13. A storm that takes you and spins you around
