

Name: _____

Date: _____

Earth Science, Chapter 1.1 and 1.2

Across

7. middle layer of earth
 10. the water on Earth
 13. the life sustaining thin gaseous envelope surrounding Earth
 15. thin outer layer of Earth
 17. study of the stars and planets
 19. educated guess
 20. study of climate and weather

Down

1. living part of Earth
 2. crust and upper mantle

3. step by step process to conduct an experiment
 4. study of the water covering most of Earth and its inhabitants
 5. planets that can sustain life
 6. Earth's internal energy source
 8. theory that the planets were formed from a rotating cloud of dust

9. theory that Earth's crust is broken into pieces and moved by Earth's internal energy source
 11. study of Earth
 12. well tested and proven fact of science
 14. The crust, mantle, and core
 16. the solar energy that powers Earth's exterior processes
 18. innermost part of Earth
