Name: _____ Date: _____ Period: _____

plant and animal cell parts

Across

3. conveyer belts inside the cells

4. a cell structure that makes protein

5. jelly-like fluid that fills a cell

9. has a plasma membrane

13. cellular organelle found in plant cells

15. is the tiny hole in the nuclear membrane

16. Move liquids past the surface if the cell

17. made up of membrane-bound sacs

18. an organelle found in eukaryotic cells

19. Cell that's bounded by a membrane

Down

1. unicellular organisms that lack organelles

2. folding of protein molecules in sacs

6. a whip-like structure that allows a cell to move

7. provides an important structural framework

8. produce the energy currency of the cell

10. protect the cell from its surroundings

11. help with cell division in animal cells

12. takes up around 25% of the volume of the nucleus

14. remove wastes
