

Intro to Physical Geography Part 1

Across

1. Causes coldest temperatures
3. Elevation on a map
5. Gases that surround and protect earth from the sun's rays
12. Above sea level
16. Latitude, elevation, ocean currents, etc.
17. The shortest place from one place to another
18. Equal amount of sunlight and darkness during a 24 hour period
19. Due to the land's lower specific heat capacity

20. 97% of earth's water is salt water

21. East of the Prime Meridian
22. Line that runs north to south
23. Made up of different places that are linked together and function as a single unit

Down

2. Where the Prime Meridian is located
4. Warm air rises, cold air sinks
6. Causes warmest temperatures
7. Latitude and Longitude find what?

8. Communities of animals, plants, etc.

9. "Parallels"

10. Biosphere, Hydrosphere, Lithosphere & Atmosphere

11. Shows directions on a map

13. One or more common features that make it different from surrounding areas

14. Natural feature of the landscape

15. Lists and explains the symbols and colors on a map
