

All About Rocks

Across

- 3. Jagged or uneven
- 6. Break up of rock by water, wind and ice
- 10. Formed from layers of eroded sediment packed together
- 11. Igneous or sedimentary rock that has changed by heat or pressures
- 14. Narrow area of the mineral that is different from the surrounding rock
- 15. Hardest
- 16. Uses the Mohs scale
- 18. Formed from magma or lava

19. Softness

- 21. Glues particles of sediment together
- 23. are materials that occur in nature
- 24. Color of mineral powder
- 25. Rocks form under the surface

Down

- 1. How light is reflected
- 2. Rocks form on the surface
- 4. Grains arranged in layers or bands
- 5. Smooth break or flat break
- 7. Solid material made up of one or more minerals

- 8. Rounded hollow rock lined with crystals
- 9. Presses sediment together
- 12. A rock that contains metal or useful mineral that can be mined & sold for a profit
- 13. Grains arranged randomly
- 17. Sediment settles
- 20. Someone that studies rocks
- 22. The study of rocks
