

Name: _____

Date: _____

Earth's Structure

Across

4. landform with high relief and high elevation

10. outer part of Earth's magnetic field

11. brittle, rocky outer layer of Earth

12. landform with low relief and high elevation

13. Earth's entire solid body

14. rigid layer consisting of crust and uppermost mantle

Down

1. landform with low relief and low elevation

2. plastic layer within the mantle

3. topographic feature formed by processes that shape Earth's surface

5. ball-shaped, all points equidistant from the center

6. dense metallic center of Earth

7. force that every object exerts on all other objects

8. mass per unit volume

9. thick middle layer in the solid part of Earth
