Name:	Date:	Period:

Biology Vocabulary

Across

- 2. Is an inorganic chemical and a salt of phosphoric acid
- **4.** Is a multibranched polysaccharide of glucose that serves as a form of energy storage in animals and fungi
- 7. macromolecular biological catalysts
- **9.** A membrane bound structure that contains the cell's hereditary information and controls the cell's growth and reproduction
- 10. An element with an atomic weight of 15.96
- 16. is a chemical bond formed between two molecules when the carboxyl group of one molecule reacts with the amino group
- 18. Deoxyribonucleic acid
- 19. The main source of energy for animals
- 20. are organic molecules that serve as the monomers or sub units, of nucleic acids like DNA
- 21. incapable of being dissolved
- 22. Is a test that measures the amount of a sugar in your blood

- **25.** comprise a group of naturally occurring molecules that include fats, waxes, sterols, fat-soluble vitamins
- **26.** Something that results in high blood prssure
- 27. is a large molecule, or macromolecule, composed of many repeated subunits
- 28. Sugars, Pasta, One basic food for a healthy leaving
- **29.** Glucose is one of the products of photosynthesis in plants and other photosynthetic organisms
- **30.** A lipid containing phospho in a group of molecule **Down**
- 1. A molecule of the kind normally found in living
- 3. containing molecule that has the same chemical properties as a base
- **5.** Any molecule that is present a living organins
- **6.** red protein responsible for transporting oxygen in the blood of vertebrates
- **8.** consist of either one or two long chains of repeating units called nucleotideswhich consist of a nitrogen base

- 11. A group of any of those occurring as esters in fats and oils.
- 12. a clear colourless viscous sweet-tasting liquid belonging to the alcohol family of organic compounds
- 13. biologically important organic compounds containing amine and carboxylic acid functional groups, along with a side-chain specific to each amino acid.
- **14.** A molecule that may react chemically to another molecule of the same type to form a larger molecule
- 15. s a hormone that lowers the level of glucose in the blood
- 17. The act of separating a body from others by nonconductors so as to prevent the transfer of electricity or of heat also the state of a body so separated
- **23.** a substance that increases the rate of a chemical reaction without itself undergoing any permanent chemical change.
- 24. An organic compound with the formula n
