

Sewing Machine Terms

Across

- 2. Raises and lowers the pressure foot onto the feed.
- 3. Area that surrounds the feed. Has guideline markings that help keep stitching straight.
- 8. Moves the fabric forward with each stitch.
- 12. Holds fabric in place against the feed.
- 14. Controls the length of the stitch.
- 15. Holds the thread spool in place as you sew.

- 16. Controls the tension on the thread as you wind the bobbin.
- 17. Changes the stitch pattern.
- 18. Feeds thread from spool to needle; moves up and down as the needle moves; 'bob'

Down

- 1. Used to wind thread onto the bobbin.
- 4. Control that allows the machine to stitch backwards.
- 5. Regulates the tightness and looseness of thread.
- 6. Covers the bobbin to hold it in place as you sew.

- 7. The small, black screw located at the top of the needle that holds it in place.
- 9. Determines how much pressure the pressure foot will have on the fabric.
- 10. A small, removable disc that is used to hold a spool of thread in place.
- 11. Disengages the needle while winding the bobbin. Located inside the hand wheel.
- 13. Moves the take-up lever and needle up and down.
