Across

- 1. Layer of gases closest to Earth's surface
- **2.** A large region of air that has a similar temperature and humidity
- **4.** a rotating funnel-shaped cloud that cloud that contains winds that blow up to 480 km. per hour
- **9.** when wind speed reaches more than 119 km. per hour
- **10.** The meeting place between air masses

- **11.** The height above Earth's surface
- **12.** Air that surrounds Earth's surface
- **13.** Blows steadily in predictable directions and over long distances
- **14.** An instrument that is used to measure atmospheric pressure
- **15.** The force put on a given area by the weight of the air above

Down

- **3.** a rainstorm that includes lightning and thunder
- **5.** An ongoing movement of ocean water
- **6.** The average weather conditions of place or region
- **7.** The amount of water vapor in the air
- **8.** The transfer of heat through the movement of gas or liquid
