Across

- **2.** A number that is multiplied by a variable
- **4.** When there is no value of "x" that could ever make it true
- **6.** A whole number that is not a fraction
- **13.** When "x" has more than one solution

14. >

15. Replacing "x" for a number

Down

- 1. A property which is used to multiply a single term (two or more) insisde a set of parenthesis
- **3.** A number, a variable, of the product of numbers and variables
- **5.** When "x" is equall to one exact number

- **7.** The power to a number or expression that is to be raised
- **8.** Making the problem smaller
- 9. <
- **10.** A letter that represents a number
- **11.** A term with a variable raised to the same power
- 12. A number on it's own
