

Name: _____

Date: _____

Pathology

Across

3. additive: increases thickness of the heart muscle
 4. additive: abnormal fluid in the peritoneal cavity
 5. additive: heart cannot pump blood and enlarges
 10. destructive: cancer of bone marrow decreasing bone density
 15. additive: localized collection of pus
 16. destructive: wasting away of body tissue
 17. additive: fluid in the alveoli
 18. additive: swelling

20. additive: increase in bone at the joints

21. additive: abnormal collection of fluid in pleural space of lung

22. additive: abnormal collection of fluid in ventricle of brain

23. destructive: softening of bone

Down

1. additive: dilation of bronchi which cause tissue thickening

2. destructive: thinning of bone in early phase

6. destructive: air/feces trapped in bowel

7. additive: fluid collects in lungs

8. additive: thickening of bone in late stage

9. additive: abnormal new growth of tissue

11. destructive: extreme weight loss

12. additive: collapse of all or part of the lung

13. destructive: hyperaerated lungs

14. destructive: air in the pleural cavity

19. destructive: loss of bone density
