# Prokaryotes vs Eukaryotes & Plant vs Animal Cells

## Across

7. organelles used in photosynthesis  
 8. only example of a prokaryote  
 9. types of tissue working together  
 11. process used by plants to make energy  
 14. process used by animals to produce energy  
 16. group of cells functioning together

17. no nucleus  
 18. long, hairlike structures  
 19. basic unit of organism  
 20. name for many celled organisms  
**Down**  
 1. organelle found in both prokaryotes and eukaryotes  
 2. nucleus  
 3. group of eukaryotes/members of the junk pile kingdom  
 4. short, hairlike structure

5. large organelle in most plant cells  
 6. organs working together  
 10. named for one celled organisms  
 12. rarely found in plants  
 13. found in animal cells for cell division  
 15. found in plants for structure
