

Name: _____

Date: _____

Biochemistry

Across

2. When monomers are covalently linked to make a polymer by removing water...

3. Loss of electrons

7. a process of making unsaturated fats saturated by adding hydrogen

10. a double layer of phospholipids

Down

1. Fatty acids with one double bond

4. 4 interconnected carbon rings

5. What is the monomer of a carbohydrate called?

6. A single layer of phospholipid with polar head facing out, nonpolar tails facing inward.

8. Gain of electrons

9. Example of monosaccharides

Word Bank

Glucose

Oxidation

Monounsaturated

Reduction

Monosaccharides

Condensation reactions

Phospholipid bilayer

Steroid

HYDROGENATION

Micelle
