chapter 2 vocabulary

Across

- **3.** products changed during a chemical reaction
- **4.** substances made by a chemical reaction
- **6.** contain carbon, hydrogen, oxygen, nitrogen, and sometimes sulfer
- **9.** non polar molecules that include fats, oils, and cholesterol
- **12.** an atom that cannot be broken down any further

13. made of monomers bonded together, large

I

L

U

Q

14. atom that gains or loses one or more electrons

Ι

В

R

Ι

U

15. reached when voth product and reactent are made at once

Down

¹⁵E

- **1.** polymer made of monomers called amino acids
- 2. smallest unit of life

- **5.** two or more atoms held together by covalent bonds
- 7. chemical energy absorbed

M

- **8.** chemical energy is released
- **10.** substance made of atoms of different elements
- 11. catalyst for chemical reactions in living things
