

Water Resources: Environmental Science

Across

2. Area of land that is drained by a river
4. Water found on Earth's land surface.
5. A flowing network of water formed by rivers and streams
8. Area of Earth's surface from which water percolates down into an aquifer
9. percentage of the total volume of a rock that has spaces (pores)
10. Underground formation that contains groundwater

11. Continuous movement of water between Earth and its atmosphere

Down

1. The level underground where rocks and soil are saturated with water
3. ability of rock or soil to allow water to flow through it
6. Water found beneath the earth's surface
7. A hole that is dug or drilled to reach groundwater
