

Chapter 4.1, 4.3, & 4.8

Across

2. Determined by rotating a ray to its end point
4. Counterclockwise rotation
8. generated by clockwise rotation
13. Means "measurement of triangles"
14. acute angle that follows a path due north

16. end point of a ray
17. includes initial side and its origin is the vertex
19. starting point of ray
20. the long side opposite to the right angle of a triangle

Down

1. equal in length to the radius of a circle
3. has the same initial and terminal side

5. sum is π
6. position after rotation
7. sum is $\pi/2$
9. contiguous side
10. soh
11. a term to measure angles
12. Cah
15. contradictory to the angle
18. Toa
