

Name: _____ Date: _____ Period: _____

Geometry

Across

1. A trapezoid with legs that are congruent.
7. Two angles that share a base of a trapezoid.
9. Parallel sides of a trapezoid.
13. A polygon with all sides congruent.
14. A parallelogram with four congruent sides.
15. A parallelogram with four right angles.

16. A quadrilateral with exactly one pair of parallel sides.

17. Do not share a vertex.

Down

2. Nonparallel sides
3. Angles of a polygon that share a side.
4. A quadrilateral with both pairs of opposite sides parallel.
5. A polygon with all angles congruent.

6. Using coordinate geometry and algebra to prove theorems in geometry.

8. A polygon that is both equilateral and equiangular.

10. Do not share a side.

11. A parallelogram with four congruent sides and four right angles.

12. A quadrilateral with two pairs of consecutive sides congruent and have no opposite sides congruent.
