# Water

## Across

8. Having pores or openings that allow water or other liquids to flow through them  
 9. Water we use on earth for cooking, drinking, etc. no salt  
 12. A large mass of ice moving over land  
 13. Found in oceans, cannot be drank by humans until after the salt is removed  
 14. An underground layer of rock or soil that holds water

## Down

1. Place where an organism lives and receives all things it needs to survive  
 2. When water seeps into rocks and between particles of soil  
 3. A region of land drained by a river and its tributaries  
 4. Does not allow water to flow through  
 5. Water found on the surface of the Earth

6. An underground water source in which water rises because of the pressure of the weight of the rocks and soil above the aquifer  
 7. A lake that stores water for human use  
 10. A land area that is covered with a shallow layer of water during some or all of the year  
 11. Water located below Earth's surface
