

Matter/Physical/Chemical Changes

Across

- 2.** the ability of a substance to be rolled and pounded into various shapes
8. is a measure of the gravitational force on an object
10. measure of how well an electric current can move through a substance
12. substance has a definite volume and shape
14. mass is not created or destroyed but is only transformed into different substances
16. anything that has mass and takes up space
17. the rate at which a substance transfers heat

- 19.** is a change that affects one or more physical properties of a substance

Down

- 1.** temperature at which a substance changes from a liquid to a gas
3. a measure of the amount of matter in a given volume
4. property that describes a substance's ability to participate in chemical reactions
5. substance has a definite volume but not a definite shape
6. temperature at which a substance changes from a solid to a liquid
7. the ability of a substance to dissolve in another substance

- 9.** occurs when one or more substances change into entirely new substances with different properties
11. characteristic of a substance that does not involve a chemical change, such as density, hardness and color
13. does not have a definite volume or shape
15. describes the amount of matter in an object
18. amount of space that an object takes up or occupies
