

Biomass Energy

Across

2. Organic matter used as fuel, especially in a power station for the generation of electricity
8. What is the gas that biomass makes called
9. What type of energy source (resource) is biomass?
10. Largest biomass resource today
11. Biomass energy is harmful to the Earth's ozone layer because it increases

12. oil rich algae can be converted into liquids and used as
13. What type of energy does all biomass contain?
14. one of the oldest ways to convert biomass to energy
15. What does burning biomass release?

Down

1. A method where biomass is heated, not burned to create energy
3. a vegetable that can be used to make biomass energy

4. This is a method of heating biomass
5. obtained from biomass
6. What can be caused by the large amount of trees used to create energy
7. Biomass can also be directly converted to energy through
