## Chapter 8 Vocab

## Across

4. The change of gas in its state to liquid
5. The pressure is high when velocity is low
6. Energy needed to change liquid to gas
7. The energy needed to change a solid to liquid
8. The increase in volume of matter as temperature goes up
9. State of matter that only has a constant volume
10. Decreasing the volume in gas then increases the pressure gas exerts 17. Property of a liquid and describes how it pours
11. Direct change of from solid to gas or gas to solid
12. The pressure applied to a fluid unchanged throughout the fluid
13. The upward force of fluid on an object
14. The buoyant force of an object in water equal to the weight of fluid Down
15. Temperature which makes a liquid change to solid
16. Change of liquid state to gas
17. All made up of tiny particles that are in constant motion
18. Temperature in which a substance changes from liquid to gas
19. State of matter keeping a volume and shape
20. High temperature state of matter that makes atoms lose their electrons
21. Temperature where a solid changes to liquid
22. SI unit of measure
23. A solid material having a regular form characteristic of given element
24. Amount of force per unit area
25. State of something that doesn't have shape or volume
26. The volume of gas increases as temperature increases
