

Energy Transformation

Across

- 4. Only form of energy that we can actually see directly
- 9. The change of energy from one form to another
- 10. Energy released during nuclear fusion

Down

- 1. Energy associated with motion and position of an object
- 2. Energy created by electrons moving through an electrical conductor

- 3. Energy associated by its position relative to others

- 5. Energy that comes from heat

- 6. Energy stored in the bonds of chemical compounds

- 7. Energy associated with being in motion

- 8. Energy associated with vibrations of matter
