## Geometry Terminology

## <u>Across</u>

3. Never touching

6. Less than 90 degrees

**9**. Larger than 90 degrees, less than 180

**12**. A precise location or place on a line or plane

**14**. A flat surface that is infinitely large

**16**. Two angles in a plane that have a common vertex and side, but no common interior points

**18**. Two angles whose measures have the sum of 90

**20**. An object that is straight, infinitely long and infinitely thin.

21. Not all on the same line

22. Lines that cross

**23**. Divides the angle into two congruent angles

24. 90 degrees

## <u>Down</u>

1. Points all on one line

2. A portion of a line which starts at a point and goes off in a particular direction to infinity

**4**. Equal measures

**5**. Two angles whose measures have the sum of 180

7. A line meeting at a right angle

**8**. Two angles whose sides form two pairs of opposite rays

10. A portion of a line

**11**. Two angles in corresponding positions relative to two lines

- 13. Lines that are not coplanar
- 15. Not all on the same plane
- 17. Points all in one plane

**19**. A figure formed by two rays that have the same endpoint
