

Anatomy and Physiology Chapter 1

Across

- 3. It is made of 11 systems that work together
- 4. Close to the point of attachment
- 6. What monitors the environment
- 11. Smallest unit of an element
- 13. Towards the back
- 15. Smallest unit of life
- 17. Extracellular fluid found in the blood vessels
- 18. Fluid found outside of the cells

19. Study of the structure of the body

20. Cavity that contains the liver and the stomach

Down

- 1. Feedback that reverses the stimulus
- 2. A cavity that contains 4 quadrants
- 5. Study of the functions of the body
- 7. A cut that divides the bod or organ into superior and inferior part

8. A fluid that allows the organs to move without friction

9. A cut that divides the body or organ into right and left parts

10. Toward the head

12. Cavity that surrounds each lung

14. Towards the surface

16. Organ that responds to control center's output
