

Muscular System

Across

- 4. state of partial contraction
- 5. end that moves when muscle contracts
- 14. turning body part upward
- 15. turning head from side to side
- 16. tough, sheetlike membrane that covers & protects tissue
- 17. end that does not move
- 19. muscle that causes movement in organs
- 20. severe tightening of flexor muscle

- 21. swinging arm in circle
- 23. controlled muscle movements
- 24. return to original shape
- 25. exhaustion; loss of strength and/or endurance
- Down
- 1. straightening
- 2. bending foot toward knee
- 3. bending foot away from knee
- 6. function without conscious thought/control
- 7. muscle that causes body movement
- 8. respond to stimulus

- 9. consists of motor neuron & skeletal muscle fibers that work with it
- 10. strong, tough fibrous connective-tissue cords
- 11. ability to be stretched
- 12. become short and thick, causing movement
- 13. turning body part downward
- 14. bending
- 15. muscle that circulates blood
