

Name: _____

Date: _____

Energy, Ecology, Ecosystems, Biodiversity

Across

6. True or false: Rainforests contain 25% of all known species on earth

8. What is the main cause of species extinction?

12. What trophic level is found in the least abundance?

15. True or false: Rainforest used to cover 50% of the world and now cover 25%

16. What ecosystems have the most biodiversity?

17. An "S" shaped curve on a population graph

18. Main source of the mass of a plant

19. These organisms eat ONLY plants

20. This describes all diversity of life

Down

1. This is a way that humans degrade habitats

2. This phrase describes the effect that a top consumer has on the ecosystem

3. These species are likely to become endangered

4. These organisms eat plants and primary consumers

5. What group of animals makes up most species in the world?

7. The percent of that total population that one species makes up

9. This describes one individual in a population

10. The number of different species in an ecosystem

11. This is the most important species in an ecosystem

13. These organisms do photosynthesis

14. These organisms are not native and always harm an ecosystem
