

Name: _____

Date: _____

Blood Cells

Across

6. A White Blood cell is also called what?
8. What is the formation of platelets called?
11. The first step to coagulation is what?
12. What is the balance between coagulation and anticoagulation?
13. Which cell types have no nucleus when mature?
16. What cell is associated with humoral immunity?

17. Where do Granulocytes mature?

18. What cells lack Granulocytes?

19. These white blood cells are defined by their round nucleus.

Down

1. These white blood cells have an indented nucleus.
2. Which Granulocytes pick up a blue/purple stain?
3. These granulocytes do not take up any stain.

4. What do monocytes become in the tissues?

5. This Granulocyte stains pink.

7. This prevents excessive clotting/thrombus formation.

9. These cells aid in the coagulation process.

10. Fibrinogen and what other plasma protein are involved in the clotting of blood?

14. An immature red blood cell is known as what?

15. What cell is associated with cell mediated immunity?
