# 14 STEPS OF CIRCULATION OF THE HEART

## Across

3. Brings blood from the right atrium to the right ventricle
7. This is supported by our circulatory system
10. This valve has three cusps
11. It allows the blood to flow out but not back into the heart
13. Deoxygenated blood enters here

14. Located in the anterior right superior mediastinum

15. Found on the superior left side of the heart

## Down

1. Found usually at the level of the 5th lumbar vertebra

2. A dual-flap (2) valve in the heart between the LA and LV

4. Large blood vessels receiving oxygenated blood from the lungs

5. Located in the right lower portion of the heart

6. The thickest of the heart's chambers

8. Carries deoxygenated blood from heart to lungs

9. The main artery in the human body

12. Primary organs of respiration
