Across

- **3.** A hole drilled into the ground built for the extraction of water, other liquids or gases?
- **5.** Whereby water moves from the surface to groundwater?
- **12.** An effect in an aquifer when groundwater is pumped from a well?
- **13.** A permeable rock that can contain groundwater?
- **14.** A rock that restricts the flow of groundwater from one aquifer to the other?

Down

- 1. Where water is accumulated above the water table in the unsaturated zone?
- **2.** A well that doesn't require a pump to bring water to the surface?
- **4.** The measure of how well a material can store water and allow it to flow?
- **6.** A fold of rock that slopes downwards?
- **7.** A level below in which the ground is saturated with water?

- **8.** Region between earth's surface and the water table?
- **9.** An area that can be described as restricted in area?
- **10.** The measure of pores in a material?
- **11.** A word that can also mean to release someone from a hospital?
