# Biomes

## Across

4. Usually temperate, humid biome that receives more than 300 centimeters of rain a year
5. Bodies of standing, still, fresh water
6. The tall trees form a leafy roof called \_\_\_\_\_
9. Below the low-tideline is a region of shallow water called the \_\_\_\_\_
10. Where the fresh water of a river meets the salt water of an ocean

11. An extremely hot area that receives less than 25 centimeters of rain per year

13. Below the canopy, a second layer of shorter trees and vines form an \_\_\_\_\_

14. Trees that shed their leaves and grow new ones each year

## Down

1. Grasslands that are located closer to the equator than prairies

2. Trees that produce their seeds in cones and have leaves shaped like needles

3. Ecosystem that includes streams, rivers, ponds, and lakes

7. An extremely cold and dry biome

8. A group of land ecosystems with similar climates and organisms

12. An area that is populated mostly by grasses and other non woody plants
