

Activity 5-Ecology Crossword puzzle

Across

2. interaction between two different species living in a ecosystem
4. a graph that shows the biomass or bio productivity at each trophic level
8. environmental conditions that limit certain things for organisms in the ecosystem
9. factors that effect the size of the population
14. the number of deaths in a given area or period
15. the ratio of the number of births to the size of the population

16. the number of organisms a region can support without environmental issues

18. living organisms in the ecosystem

19. a species that other species in the ecosystem depends on

20. weather/climate that influence the population size

Down

1. the number of all the organisms of the same group or species
3. the process of certain organisms that move up the food chain
5. the variety of life in the world/habitat

6. the extinction of a large number of species within a short period of time

7. the series of community changes which take place on a damaged habitat

10. one of the two types of biological and ecological succession of plant life

11. the important benefits for organisms that comes from species working in the ecosystem

12. beneficial to both organisms

13. non-living organisms in an ecosystem

17. a community of interacting organisms and their physical environment
