

Microorganisms

Across

5. Microorganisms that cause infectious disease
6. Microbes that grow on other organisms
8. Small microbes that pass through most filters
10. Biologic or chemical agents that create immunity
12. Centers for Disease Control and Prevention
13. Recently appearing infectious diseases in a population
17. Bacteria that live without oxygen
18. Bacteriostatic agents used on inanimate objects
19. Confined to one area of the body
21. Methicillin-resistant staphylococcus aureus
23. Absence or control of microorganisms
25. Chemical agents that treat disease
27. Epidemic spread over several countries
28. The way microorganisms enter the body
29. Excess of normal occurrences of a specific disease

Down

1. Pathogen that lives in blood
2. Bacteriostatic agents used on skin
3. Encapsulated bacteria in an inative state
4. Spread through the body
7. Spread of disease by contact with pathogen
9. Ingested or injected substances that have ability to inhibit growth or destroy pathogens
11. Process of destroying all living organisms
14. Number of portals of entry for microorganisms
15. Increase in normal number of cases of specific disease in a defined geographic area
16. Usual amount of specific disease in a community
20. Occupational Safety and Health Administration
22. Bacteria that requires oxygen for survival
24. Organism that lives at the expense of another
26. Animal pathogen, parasites
