

Name: _____

Date: _____

Circle Vocabulary

Across

2. a line that intersects a circle in two points
 7. if the endpoints of a chord or arc lie on the sides of an inscribed angle, the chord or arc is said to subtend the angle
 9. a circle that contains all the vertices of an inscribed polygon
 11. the point from which all points on a circle are equidistant
 12. coplanar circles that have a common center

14. a part of the circumference of a circle
 15. an angle whose vertex is the center of a circle

16. an angle whose vertex is on a circle and whose sides contain chords of the circle

17. an arc that lies between two lines, rays or segments

Down

1. a line in the plane of a circle that intersects the circle at exactly one point
 3. chord that contains the center of a circle

4. a segment whose endpoints are the center and any point on a circle

5. coplanar circles that intersect in one point

6. an angle whose sides are tangent to a circle

8. the distance around a circle

10. an arc with endpoints that are the endpoints of a diameter

13. a segment whose endpoints are on a circle
