# Viruses, Bacteria, and Archaea

chemoheterotrophs  
transformation  
retroviruses  
prokaryotes  
pathogens  
viroids  
virus

emerging viruses  
binary fission  
methanogens  
lytic cycle  
mutauism  
reverse

lysogenic cycle  
bacteriophages  
saprotrophs  
halophiles  
linchens  
prions

peptidoglycan  
transduction  
conjugation  
endospores  
archaea  
capsid
