Human Evolution

Across

2. these scientists are no fools, they knew I was different from Australopithecines & I may have been the 1st to use stone tools

5. it was hot then cold, leading to over 100 species of apes 23 million years old

6. We are the 3rd Hominin species to emerge & w/ the help of our flaring zygomatic bone & sagittal crest, a variety of foods were easy to chew & digest

9. I am an Aus. Afarensis, with derived valgus knee & lumbar lordosis; my legs are short, my fingers long, my scientists gave me this 4 letter name after a Beatles song

10. having long, narrow trunks, tails & bilophodont teeth were the norm, until 25 mya when hominids split from ____ & began to transform

11. this species shows derived traits & progression making it the first 'true' Hominin without question

12. I'm an Australopithecus, also known as Taung Child, hunt or be hunted is the motto & it was by the Eagle's claw I was exiled.

13. Megadont teeth played a massive role in naming this robust hominin The Black Skull.

15. I come from Flores, Indonesia, stand 3 ft 6 inches tall, that's where scientists got my nickname cause I'm the smallest Homo of them all.

16. I'm an Australopithecine, I lived 2.5 mya & when they discovered my Oldowan Tool Industry it was dynamo

17. 8-12 mya the cranium of this Eurasian hominid reflects the modern Pongo

Down

1. I am the earliest possible Hominin found in Chad, with small molars, a flatter face & a forward foreman magnum, making my discovery pretty rad

3. They used mousterian tools & cared for elderly just like humans do, but unlike other Homo species, their DNA may still be present in me & you.

4. We were the 1st to control fire, hunt w/ spears, build structures & burials, which makes our species of Homo pretty cool; but nothing advanced us more than the upgrade we gave to stone tools.

7. hominids were dealt a separate fate from their common ancestors who lacked this trait

8. the earliest cercopithecoid lived 19 mya & moved into places hominids couldn't go.

14. my Y-5 molars gave me the nickname 'dental ape' I show a mix of anthropoid & hominoid traits
