# Nanotechnology

## Across

- 2. AFM stands for what term?
- 9. Builds the material from atomic or molecular species.
- 10. The measurement used in reseaching and developing nanotechnology?
- 11. Can change due to an increase in surface area.

## Down

- 1. Properties of certain materials in dependent on what range?
- 3. What source of carbon is used in chemical vapour disposition?
- 4. CPU stands for what
- 5. The science of the very small with big potential
- 6. Electronic deveices use this form of nanotechnology
- 7. Graphene is made form a single atomic plane of what?
- 8. Starts with bulk material and is broken into smaller pieces.
