# Human Impact on Climate Change

## Across

3. a ridge of rock in the sea formed by the growth and deposit of coral  
5. a large area covered with trees and undergrowth  
9. the level of the sea's surface  
13. a severe snowstorm with high winds and low visibility  
14. a woody perennial plant  
15. the practice of fanning  
16. break down chemically  
17. an ecological or environmental area where a specific species lives  
19. the ability to be maintained at a certain rate or level

20. naturally present in air and absorbed by plants in photosynthesis  
21. a person or thing that prevents someone or something from suffering harm or injury

22. change related to or determined by the sun  
23. gases surrounding a planet

## Down

1. all the inhabitants of a particular town, area, or country  
2. a gas that contributes to the greenhouse effect by absorbing infrared radiation, e.g., carbon dioxide and chlorofluorocarbons  
4. a structure with a roof and walls

6. storms of catastrophic proportion

7. the act of clearing a wide area of trees

8. a biological community of interacting organisms and their physical environment

10. wild animals

11. the emission of energy as electromagnetic waves or as moving subatomic particles

12. the process or state of breaking or being broken into small or separate parts

18. a storm with a violent wind
