STats Vocabulary

Across

- **4.** the occurrence of one event does not affect the other
- **6.** type of sample preventing bias
- 7. elements that are not in the set
- 16. elements common in all sets
- **17.** subset of the outcomes (portion of the total)
- 20. average
- **22.** In a normal curve, the 1st standard deviations are 68%, 2nd 95%, 3rd 99.7%
- **24.** the actual probability that occurs in an experiment
- **25.** When a sample is chosen from an entire group at random

Down

- **1.** the likelihood of an event based on mathematical reasoning
- **2.** the set of elements that belong to one or both sets.
- **3.** sample of population favors a certain circumstance
- **5.** total number of outcomes
- **8.** Data Curve showing usual probability
- **9.** A numerical quantity measuring some aspect of a population of scores
- **10.** An event in which more than one outcome is possible
- 11. probability that event a and b will both occur

- **12.** A numerical measurement describing some characteristic of a sample
- 13. Gives the number of how many standard deviations x lies from the distribution mean
- 14. categorical data
- 15. numerical data
- **18.** Process of applying a treatment to a sample group
- **19.** chance of something happening
- **21.** way to gather information by asking people questions
- 23. Favors a certain outcome
