Chapter 4

Across

- **2.** Bacteria that appears in long chains and is pus forming
- **3.** Cause infection and disease, spread easily
- **6.** The body's ability to destroy infectious agents that enter it
- **11.** Agency that approves the efficacy of a product
- **17.** Bacteria that appears in spirals, can cause syphilis
- **18.** Pressurized steam heated vessel that sterilizes objects with high pressure and heat
- **19.** Chemical products used to destroy or kill bacteria and some viruses
- **20.** What Infection is small and confined to an area

- **21.** What stage do bacteria grow rapidly
- **22.** A submicroscopic particle much smaller than bacteria
- **24.** Bacteria that appears in pairs and causes pneumonia
- **25.** Chemical, electrical and heat_ are possible in esthetic environment

Down

- **1.** Bacteria that appears in bunches and found in boils
- **4.** Can be transmitted from one person to another usually through touch or air
- **5.** Using the same infection control procedure on all clients
- 7. Do not produce disease, can be very beneficial
- **8.** Lowest level of infection control

- **9.** What is the study of small living organisms called microbes?
- **10.** Utilizes UV light to kill bacteria in a dry setting
- **12.** level of infection control that kills bacteria and some viruses
- 13. Most common form of bacteria
- **14.** Bacilli and spirilla use this to propel themselves
- **15.** Most effective level of infection control
- **16.** Ability to produce results,or effectiveness
- **23.** Type of bacteria that appears in groups or singularly
